
Setup of Apple Watch with Gfit

The following instructions will guide you through registering your Apple Watch with the Gfit app and then you can get registered with Cure Science at appomics.org.

Before setup:

- Always wear the Apple Watch properly on your wrist.
- Please wear your Apple Watch throughout the day so that all data can be recorded Incomplete data will not be useful for analysis.
- Please always keep your Apple Watch connected with the Apple Health app on iPhone which will communicate using Bluetooth /WiFi. This is required for proper syncing of the data with the Apple server which will receive the data.
- Be sure to open your Apple health app and Gfit app at least once daily to allow the data to sync with the app and server.

Step 1: Google fit app installation

Install Google Fit app from iPhone App store. You can use the following link :-

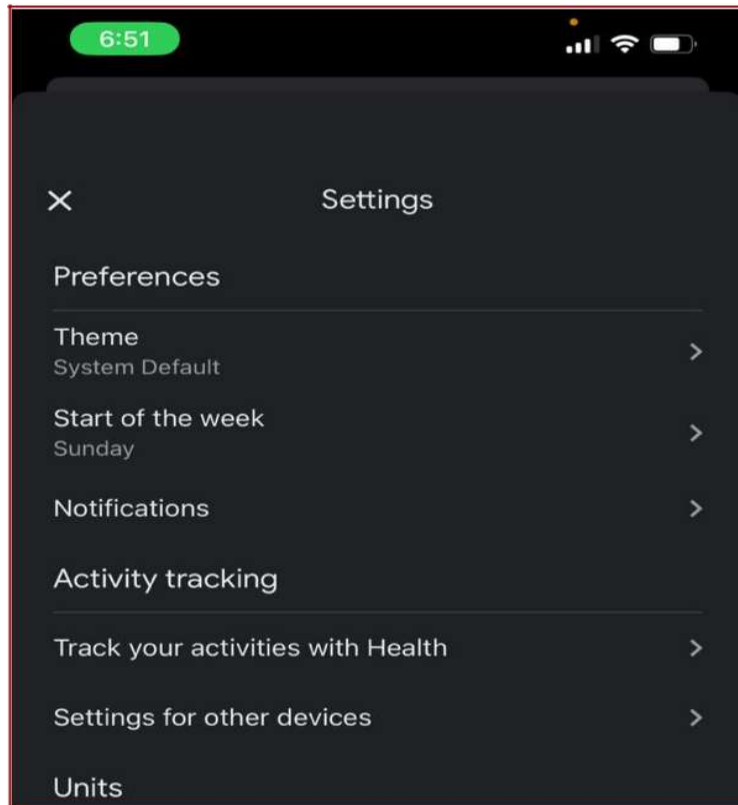

<https://apps.apple.com/in/app/google-fit-activity-tracker/id1433864494>

Login with your Google account username(email) and password in the Gfit app.

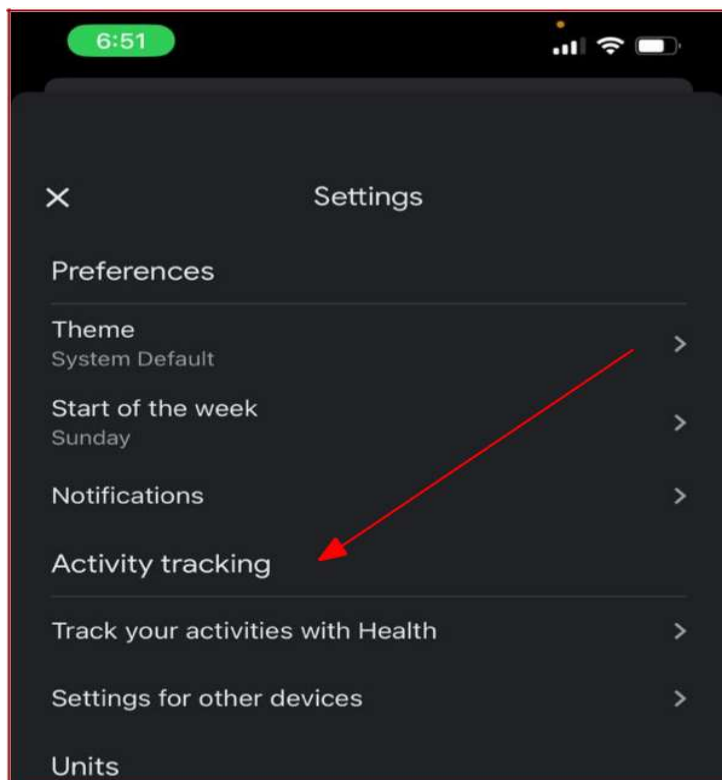

Step 2: Sync data with Google fit App

1. Tap on the 'profile icon' in the top right corner of Gfit app window (shown with arrow below).

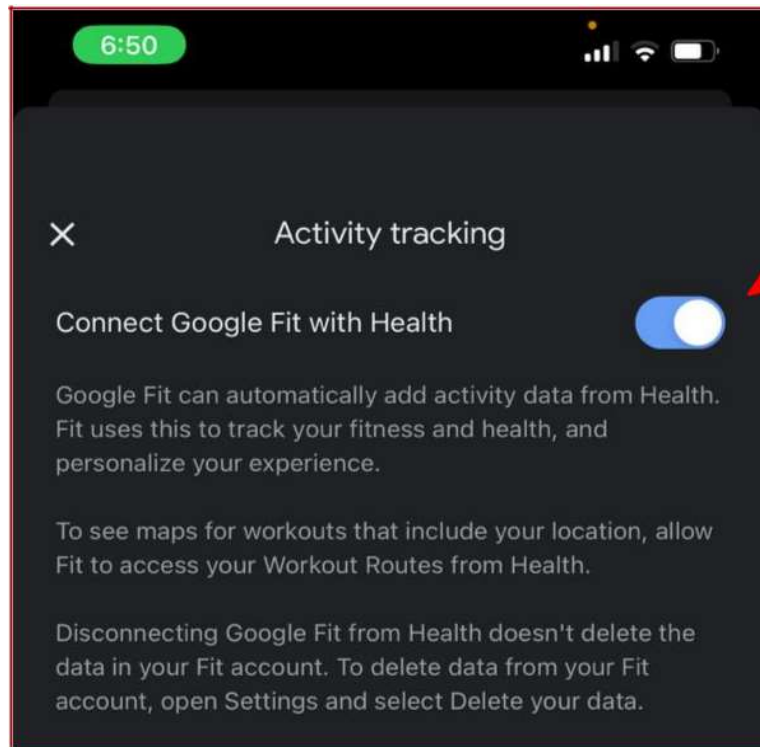

2. Tap on Settings:

3. Tap on Activity tracking with apple health app

3. Turn on “Connect with Google Fit with Apple Health” (shown with arrow below)

Step 3: Register with CureScience

During this step you will set up your Apple Watch to share data with the CureScience server.

To register with CureScience, open the following link in a web browser and follow the instructions to register.

<https://appomics.org/Wearables>

Please fill the required information in the form and click on the “Google Fit” option to get registered.

Please Enter Your Details
